

SACHIN

Bengaluru, Karnataka | +91-6363800529 | sachinawbay@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Enthusiastic Computer Science student with strong skills in **Data Structures & Algorithms (DSA)** using **Java**. Proficient in **SQL**, **Python**, and core CS fundamentals including OOP, DBMS, OS, and Computer Networks. Experienced in Android development, ML pipelines, and Java applications. Passionate about clean, efficient code that solves real-world problems.

TECHNICAL SKILLS

Languages	Java, Python, SQL, HTML, CSS, JavaScript
Databases	MySQL, Oracle PL/SQL, Relational Database Management Systems (RDBMS)
Tools & Frameworks	Git, GitHub, Android Studio, IntelliJ IDEA, VS Code, JDBC,Pandas, NumPy, Random Forest
Core Concepts	OOP, Data Structures & Algorithms (DSA), DBMS, SQL Query Optimization, Operating Systems, Computer Networks
Soft Skills	Analytical Problem-Solving, Cross-functional Collaboration, Rapid Adaptability

EXPERIENCE

Android App Development Intern	February 2026 – May 2026
MindMatrix, Bengaluru, Karnataka — Namma-Hasiru: Tree Plantation Monitoring App (Kotlin, Android Studio)	
- Integrated GPS tracking and Google Maps API for real-time location services, mapping 50+ plantation locations with high localization accuracy. - Identified and resolved 15+ UI and logic bugs in Android Studio, improving stability and reducing crashes significantly. - Developed modular Kotlin-based UI components and optimised database integration for efficient data retrieval over 3+ months.	

PROJECTS

Crop & Fertilizer Recommendation System	GitHub ↗
Python • Random Forest Classifier • Pandas • NumPy • Machine Learning	
- Engineered an end-to-end ML pipeline using Random Forest Classifier, achieving 92% predictive accuracy on validation datasets. - Executed data cleaning, feature engineering, and EDA to reduce overfitting; built an interactive UI delivering a 20% improvement in crop selection.	
Algorithm Visualizer Application	GitHub ↗
Java • Core Algorithms • Data Structures • Object-Oriented Design	
- Built an interactive desktop app with real-time rendering of Bubble Sort, Merge Sort, and Binary Search execution flows. - Applied strict OOP design patterns to track data-structure transitions dynamically for pedagogical clarity.	
Library Management System	GitHub ↗
Java • MySQL • JDBC • Relational Database Design	
- Architected a database-driven system using JDBC for entity relationship management and structured record retrieval for books and members. - Authored transactional SQL CRUD operations ensuring full data integrity across relational tables during stress testing.	

EDUCATION

Bangalore Institute of Technology	November 2022 – June 2026
B.E. in Computer Science and Engineering	Bengaluru, Karnataka CGPA: 8.5/10
Shaheen Independent PU College	June 2019 – May 2021
Pre-University / Class XII	Bidar, Karnataka 96.33%
Morarji Desai Residential School	May 2018 – April 2019
SSLC / Class X	Bidar, Karnataka 91.52%

CERTIFICATIONS

Java Programming Masterclass	Udemy	May 2024
Database Structures & Management with MySQL	Meta Professional Cert.	August 2025
Build a Secure Google Cloud Network	Google Cloud Skills Boost	October 2025
JNCIA-Cloud (Cloud Associate Certification)	Juniper Networks	August 2025
